Legal Information

This prospectus (whitepaper) has been prepared for informational purposes only and changes may be made to this prospectus in the future. None of the information contained in this document is intended as an investment recommendation, nor does it constitute an offer. The digital asset that is the subject of the prospectus is not a capital market instrument, financial instrument or security.

Digital assets have high volatility. For this reason, it is recommended that all people who will purchase Four Token have knowledge of digital assets, blockchain and smart contract structures. These individuals must make their own risk assessment. These assets may be considered very high risk assets.

Bitexen Europe UAB is not responsible for any damages that may arise due to the insufficient information provided in this prospectus, updating this prospectus or any issue related to the content of this prospectus. ("Bitexen Global") and ExenPay Teknoloji A.Ş. ("ExenPay") is not responsible. The person purchasing the token is responsible for the token purchase and sale decisions of the token purchasers, the consequences arising from these purchase and sale decisions, the transactions to be carried out by these persons, and any risks that may arise due to these transactions, and Bitexen Global and ExenPay have no liability for these.

Partnership

With this project carried out with Four Magazine, ExenPay has been authorized to produce Four Token (FOUR). FOUR Token pre-offering and buying and selling transactions will be carried out on the Bitexen Global platform.

EXENPAY

ExenPay, which has the right to produce the Token digital asset, is a technology company that works on payment systems and tokenization in the field of financial technologies. ExenPay Teknoloji A.Ş. is a company established and providing services in accordance with the laws of the Republic of Turkey.

Risk Information

Liquidity Risk: Crypto assets may lose value when converted into fiat currencies. This loss creates liquidity risk in the market. In addition, in times of crisis or stress in the market, low liquidity may occur and delays and loss of value may occur in the exchange of crypto assets with other asset units.

Market Risk: The crypto asset market is generally known and moves with high volatility. This element is in linear proportion to the prices formed on independent digital asset platforms in the market. High volatility in crypto assets may also cause price and liquidity differences between platforms.

Systematic Risk: Crypto asset projects can be described as initiatives, and among the reasons why the targeted project may not be successful are; Systematic risks may arise in the event of regulatory regulations, force majeure (war, natural disaster, political and political developments) and possible technological impossibilities (reconciliation, technological, etc. other problems of the Binance Smart Chain network).

Reputation Risk: Loss of crypto assets by crypto asset owners, any infrastructure and service failures that may occur on the network, or any extensive reputational losses that may arise from collaborations with third parties may pose a risk.

Unsystematic Risks: These are the problems that may arise before, during and after the crypto assets are exported, ensure their operations and reach the end user. This risk element includes, but is not limited to, liquidation of the relevant company, technological infrastructure inadequacies and cyber attacks, liquidity problems, legal disputes between collaborating companies, and non-systematic risks accepted in traditional finance theories.

Legal Risks: These are the risks that may arise with the creation, amendment or repeal of the relevant legislation. Within the scope of these risks, not only the legislation concerning crypto assets, but also other applicable legislation may be violated in the future.

Other Risks:

Blockchain wallet address risk: In case of loss of the private key required to access the assets on the blockchain, access to the relevant assets may be lost or there is a risk of them falling under the control of third parties.

Tax Risk: Taxation proposals that may arise regarding crypto assets may pose financial risks. And this taxation may bind the real/legal persons who purchase crypto asset projects and any companies that carry out the operations of the projects.

Dictionary

Bep-20: BNB, also known as Binance Smart Chain or simply BSC, is a token standard built on Smart Chain. BEP-20 is BSC's equivalent to ERC-20, the token model used on the Ethereum Blockchain. This means that the two token models are compatible with each other.

Smart Contracts: Solidity, Python etc. on Blockchain. They are decentralized code directories developed with programming languages and having fixed rules. These code directories run automatically on a distributed network.

Private Key: It is the authorization key required to perform any transaction on the blockchain. Private Key is created within certain cryptographic conditions and cannot be changed afterwards. Public keys can be created by taking derivatives of private keys.

DLT: Distributed Ledger Technology is the general name given to storage methods in the upper category of blockchain technology. Blockchain is the name given to the distributed ledger technology, in addition to which the stored data is encrypted and processed with timestamp.

Solidity: It is a programming language used to write or develop “Smart Contracts” that run on the Ethereum blockchain.

NFT: NFTs, which is the abbreviation of the word non-fungible token, are used as unique tokens in our language. These tokens are generally produced in the ERC-721 and ERC-1155 token standards on the Ethereum network.

ERC-721: Unlike ERC-20 token standards, the Ethereum network includes token rules and standards that create tokens that are not interchangeable, non-convertible and non-fungible.

Fan Token: They are blockchain digital assets that allow fans to support the teams they admire while gaining various rewards, discounts, campaigns and unique experiences.

Utility Token: It is a type of token that offers a certain service or advantage to its holders. It does not grant any shares/share rights.

Bitexen Europe UAB will perform identity verification for each user who will purchase Four Token via global.bitexen.com. In this context, the Four Token project will operate in accordance with the Law No. 5549 on Laundering and Prevention of Proceeds of Crime within the framework of the legal regulations of the Republic of Turkey. Transfers of Four Token on the Binance Smart Chain blockchain will be monitored with blockchain tracking tools, aiming to prevent risky transactions, but Bitexen and ExenPay do not give any guarantees or commitments in this regard.

Individual users who will purchase Four Token on the Bitexen Global platform;

- e-mail information,
- Identity Numbers,
- Name and Surname information,
- Phone numbers

They complete the verification stages by sending them and other information that may be requested. Users whose information is verified during registration can purchase Four Tokens. Individual users whose names are on the banned lists cannot register on the platform and cannot buy or sell Four Tokens.

Social Tokens

Social tokens are cryptocurrencies based on a community, brand, or creator. These tokens are used integrated with various activities to create and reward fan groups. Community members who own social tokens can obtain various advantages, unique experiences and special experiences. These features sometimes provide unique experiences such as accessing community or individual content and participating in special organizations.

Thanks to blockchain technology, social tokens give communities, artists or brands the chance to create an ecosystem of their own fans. Social tokens, which help fans and content creators interact more closely, also enable content creators to more easily control the earnings they earn through their work. NFTs, which are non-fungible tokens that have been on the agenda lately, are social media tokens. The most important feature that distinguishes NFTs from other social tokens is that they are unique and unchangeable. In other words, social tokens; It provides the same benefits, privileges and rights to all investors who invest in a work of art or a piece of music. NFT holders, on the other hand, have unique rights to a specific piece of a creator's work.

Social tokens are a way to incentivize everyone towards joint projects in a DAO, a crypto-based decentralized community, in exchange for a digital currency. This digital currency can then be converted into other cryptocurrencies or utility tokens, or used in exchange for special benefits within the community to which the tokens are associated, such as the right to vote on future strategic decisions or early access to community NFTs.

Introduction

The FOUR Token is an innovative BEP20 cryptocurrency designed to enhance the luxury travel, dining, and hospitality experiences for its holders. Targeting discerning enthusiasts of high-end travel, gourmet cuisine, and premium accommodations, the FOUR Token offers a plethora of exclusive benefits through a dynamic and engaging rewards system.

About Four Magazine

FOUR is more than a magazine. It's a voice for luxury, a source of inspiration and the reference for a life well-lived.

A multi-award-winning lifestyle magazine, *FOUR* offers a lifestyle twist that is a must-read for the high-net-worth individual. The *FOUR brand* is rapidly expanding, investing and strengthening its creative output, both digitally and in print.

Focused on the international market, *FOUR aims* to reach readers in the A/B bracket via precise distribution channels worldwide. This includes close relationships with private jet airlines, *VistaJet* and *XO*, and the top 35 FBOs in the United States. In addition to this, *FOUR* is also distributed to the world's best hotels including *Kempinski* and *Cheval Blanc*, as well as restaurants, business lounges, spas, golf clubs and private residencies. In partnership with leading lifestyle management brand Insignia, *FOUR* reaches the hands of over 3500 U/HNW individuals across the globe.

Because of this precise distribution, *FOUR* has the ability to reach high-end food lovers in a way that has never been done before.

About Four Magazine

Each edition of *FOUR* invites four chefs, who are at the pinnacle of their career, to share their passions, philosophies and journeys with our readers. By unifying over 400 of the world's best chefs, such as Daniel Humm, Thomas Keller, Gaggan Anand, Massimo Bottura and René Redzepi, *FOUR* spotlights the brilliance of haute cuisine's greatest minds.

Working with some of the world's most well-respected food and wine writers, including Andrea Petrini, as well as some of the world's top food photographers, travel writers and designers, such as Jean Cazals, Jeremy Jauncey, Michu Travel, Guy Oliver and Kelly Hoppen, *FOUR* is raising the bar in food and lifestyle publishing.

Each edition of *FOUR* magazine has been designed to reflect the diverse interests and passions of those who enjoy a luxury lifestyle, with editorial focusing on gastronomy, travel, property, fine wine and cocktails, art and culture.

Token Benefits
